

COMPUTER SCIENTIST CHRISTOPH HOLZ

FUTURE, INNOVATION, IT / TECHNOLOGY

Christoph Holz studied computer science and space technology. He is a university lecturer and a real cyborg. As a business angel, he invests in artificial intelligence, blockchain and co-living from Australia to Singapore. Startups benefit from his 20 years' experience as an IT entrepreneur in Europe and Silicon Valley. He is known to the general public as a TV expert e.g. at Sat1, Welt or n-tv.

As a speaker at Google, TEDx and BMW, Christoph Holz is able to create a profound and humorous bridge between technology, the economy and society. For Holz, freedom in the digital revolution is formed by a society without the state, markets without money and an economy without enterprises.

LECTURES

DIGITAL WORLD ORDER AFTER COVID-19

How the crisis is affording new opportunities and how all will be well.

ROBO-DOC – THE FUTURE OF HEALTH WITHOUT PANDEMICS

How AI, Tesla and quantum computers are upgrading our life and health.

THE DIGITAL REVOLUTION IS THE REVENGE OF THE AUTISTIC AGAINST THE NARCISSIST

The class struggle behind digitalisation.

THE WINNETOU FACTOR

What we can learn from the Apaches about the future of our digital civilisation.

WELCOME TO THE STATE 2.0

How Google, Tesla, Facebook & Co. are making room for markets without money and societies without the state.

FREEDOM IN THE DIGITAL REVOLUTION

Society without the state, markets without money and business without enterprises.

LECTURES

THE SILICON VALLEY STRATEGY

What makes a successful start-up culture and how can established companies benefit from it?

BULLSHIT 4:0 – OR THE REDISCOVERY OF ENTREPRENEURSHIP

The drastic changes that are really coming beyond digitalisation and how we can realise our competitive advantages in time.

A.I. – I'LL BE OFF THEN

An insight into the eternal failure of smart machines and how we can benefit from this.

BLOCKCHAIN – THE END OF CORRUPTION

The benefits of blockchain for the economy and: „why I hide the packaging after eating my children's chocolate“.

DIGITALISATION AND THE BEAST

How we can learn to love change.

A HAPPY ENDING THANKS TO ROCKET SCIENCE?

Climate change, war and disease: how space technology, quantum computers and blockchain can solve mankind's biggest problems.

- Lecture
- Interview
- Seminar
- Consulting
- Talk/discussion
- Moderation
- (Individual)Coaching
- Online/Web based
- Workshop

SEMINARS / WORKSHOPS

MENTAL GAMES AS A TRAINING CAMP FOR THE FUTURE

The better workshop meets the intellectual needs of its participants!

Do you want to get the most out of your workshop and discuss it with your participants? With my surprising mental games, inspiring workshops can be manoeuvred according to the specific interests of the participants. A method that is fun, intensifies the workshop and involves people interactively.

But what are mental games?

Mental games play with the conceivable. They involve people with their ideas, conceptions and hopes. And that makes things exciting and inspiring.

How does that work?

The workshop consists of combinable mental games that participants can choose spontaneously. The „common thread“ is the basic question of digital ethics: „What should I do?“ In between, there is time to get to grips with the provocative theses. The result is a tailor-made workshop that is unrepeatable.

SPECIAL TOPICS: MENTAL GAMES

- **Business without enterprises:** how will Covid-19 change our business?
- **Markets without money:** why does the captain of the starship USS Enterprise, Jean-Luc Picard, have no wallet?
- **Mental transformation:** how does the programming of the society work?
- **Digital monitoring:** if digital surveillance works, why do we need another coronavirus app?
- **Social networks:** why do we need cities when everyone has a smartphone?
- **Nation at its peak:** what does Facebook lack for it to become a proper state?
- **Antivirus software:** can we use algorithms to avoid the next pandemic?
- **Vaccinations on demand:** when will we be able to come up with new therapies as soon as we need them?
- **Economic vs viral growth:** if humanity were a pandemic, would it have the same limits as Covid-19?

FACTS, FIGURES AND DATA

- 54 years a citizen of the Earth
- 38 years a software developer
- 28 years a lecturer
- 26 years an entrepreneur
- 24 years a publicist
- 22 years a university lecturer
- 21 years a husband
- 20 years an apprentice trainer
- 10 years a father
- 8 years an investor
- 2 years a book author
- Always a family man and maybe soon a space tourist
- An audience of millions from 77 countries reached via television and radio appearances (including ORF, Sat.1, Welt, NTV, CNBC, and many more)
- Around 520 lectures and presentations in German and English in Europe, America and Asia
- Audience from 88 countries from all continents (not sure about Antarctica, though)
- 7 Nominations and awards
- 5 Certificates as a court expert, CMC, CSE, CDC and apprentice trainer

REFERENCES

AWARDS

- Awarded the title of “Born Global Champion”
- State Innovation Award
- Nominations for the state “Digital Solutions” prize

CUSTOMER FEEDBACK

- Super performance ride through the greatest variables of mankind, explained from the past to the future. Gigantic didactics and analysis and finely ironic entertainment. This lecture sets the overall framework.
- With a great deal of wit and dry humour, he conveyed the topic to the audience. Known and unknown things in the right context provided many new insights and food for thought.
- Wonderfully witty, laconic and insightful performance on future-relevant content.
- Christoph Holz is an extremely inspiring speaker who manages to captivate his audience by combining personality, wit and competence.
- Seldom heard such a humorous and informative lecture.
