

HANS-CHRISTIAN (CHRIS) BOOS

ECONOMICS, FUTURE, IT / TECHNOLOGY

The name Hans-Christian (Chris) Boos is synonymous with artificial intelligence. The one-time founder of Arago, a leading company for Artificial intelligence (AI) in Germany, supports established companies in their transformation into the digital age. The visionary has a mission: to release human potential and to create more room for creativity and innovative thinking with the aid of AI. He embellishes the current discussion regarding AI with constant new perspective e.g., in his role as a strategic advisor for companies and politicians or as an investor. As a member of the Digital Council of the German Government he advises Angela Merkel and her team in all question pertaining to digitalization. His diverse commitment to AI ensures he is a valued speaker and a trailblazer in topics of global relevance as in the relationship between Man and Machine, the manner in which companies handle data and the future of work in general.

POLITICS **RESILIENCE** **GLOBALIZATION** **TRANSFORMATION** **INNOVATION** **ECONOMY**

SPEECHES

Artificial intelligence: essential for every business

- What is behind AI, short and long term effects of AI, how KI functions, why we should not be afraid of AI and how we should apply AI in our companies.

What exactly does Data really mean

- Data, the perhaps most misunderstood and misused commodity in the world. What exactly does data actually mean. How to go from uncommitted to committed data and what do we actually use data for?

The new humanism. The future of work

- When machines do the work that we are currently executing, what will we do then and why will we all be happier and more productive?

An optimistic plea for a technology operated future

- The industrial system that we have been optimizing for more than 150 years is becoming more and more unstable. In Europe we have the opportunity to arrive at a new and sustainable basis for technology and expertise.

SPEECHES

Economy after the Industrial era

- When the ability to manufacture something is no longer decisive but rather the knowledge of how something is manufactured, we will go from an industrial society to a knowledge society. We discover which companies will be successful in this era and why.

Digital Transformation – The hard truth

- For the most part, everything that is digital is pure marketing. This speech describes the hard work that is essential here including the stringent decisions and the respective Leadership that are necessary in order to really become part of the digital economy.

INFORMATION

Fees: on request

Travel expenses from/to place: Munich (D)

Languages:  

- Individual content customisation possible
- Handout/further documents

FORMATS

- Lecture
- Interview
- Seminar
- Consulting
- Talk/discussion
- Moderation
- (One-to-one)Coaching
- Online/Web based

SEMINARS / COACHING

Data or why you should occupy yourself with semantics and graphs (seminars / workshops)

- How do you progress from data to information, to knowledge, to intelligence to wisdom. How far is research? What algorithms have been applied and are commercially available? What is the difference between uncommitted and committed data sets? How do you build profitable semantic data sets and how do you arrive at strategic advantages?

AI in your own company (seminar / workshop / coaching)

- How to get beyond Pilots and Showcases and how to position KI as a tool for Transformation: where can AI be applied in your own company and what technologies can be used? How to build a long-term strategy and also, how to use short-term results.

Let machines take over (workshop / coaching)

- Why "analyzing- standardizing- consolidating-executing" is no longer up to date. How do you distinguish between process automation and knowledge automation and how AI helps with knowledge management?

ADVISING / CONSULTING

AI Strategy for your company – Development and review

- Development of an AI strategy that suits your company
- Implementation and Review

Data Strategy for your company – Development and review

- What is data strategy and why is it important?
- How do you build up data sets?
- How do you Valuate and assess these?

Future assessment your company from the Silicon Valley perspective

- What would an entrepreneur from Silicon Valley say about your company?
- Analysis of strengths and weaknesses
- System development, in order to be fit for the future

FIGURES, DATA AND FACTS

- Studies in Computer Science in the ETH Zürich and in the Techn University Darmstadt
- Founder & CEO of Arago
- Member of Kognitio (Data specialists and provider of storage space platforms)
- Member of the Digital Council of the Government of Germany
- Member of the Board od Trustees of the Deutsche Telekom Stiftung
- Advisor to the Heraus Stiftung
- Supervisory Board function in various Startups (i.a. DeepL, XBAV, Data Artisans)
- Author of numerous academic publications
- Consultant at: Evian,DLD, Digitalgipfel, TED, TedCrunch Disrupt, NOAH, Web Summit, WEF Founder's Forum and other Fortune 500 company events.
- Research focal points: graph theory, (distributed computation) and AI with emphasis on mechanical problem solving in combination with mechanical learning approach as knowledge use and presentation,
- The Jury Deutscher KI Preis, Mckinsex AI Award

REFERENCES

Awards

- John F Kennedy National Leadership Award (for exceptional performance in IT sector)

„nobody can explain artificial intelligence so good and so clearly as Chris Boos in particular for non- Experts.“

Gisbert Rühl, CEO Klöckner

„Chris Boos is Germany's Mr. Artificial Intelligence.“

Lucian Schönefelder (KKR)

„We need a "welcome Culture" for innovation; Chris Boos is an expert for artificial Intelligence. Digitalization is a huge chance. He demands a welcome culture for innovation from Angela Merkel. Sitting it out is not a solution.“

DIE WELT

„Arago founder Chris Boos on the fear of artificial intelligence, cowardly companies and how we can protect ourselves from being monitored by the state.“

Süddeutsche Zeitung
